

## PROJECT NAME: SMART FORMING USING IOT

### OBJECTIVES AND GOALS:

- Internet of things solution are focused on helping farmers supply demand gap, ensuring high yields, profits and protection of environment.
- There are three objectives sustainably increase the agriculture
- There are three objective sustainably increase the agriculture productivity and incomes, adapting and building to climate change.
- Reducing (or) removing greenhouse gas emissions if possible.

### PROBLEM STATEMENT:

- Farmers are under pressure to produce more food and use less energy and water in the process.
- A remote monitoring and control system will help farmers deal effectively with these pressures.
- Smart forms provide immediate impact with very short return on investment time period..
